WEEKLY ACTIVITIES & STATUS REPORT FOR THE DD/ICS--7 MAY 1986

25X1

25X1

NFIP Support for Contingency Operations -

- The working group has met three times since being inaugurated on 23 April 1986. After much discussion, the working group has decided to limit the study to those contingencies where US forces are involved or where there is a prospect that US forces might become involved. Additionally, the working group has reviewed, expanded, and coordinated on the TOR, and begun a series of briefings on how members of the Community presently support contingency operations.

25X1

- On 29 April formerly an IC Staffer and a participant on the Long Commission, briefed the working group and provided valuable insights on the role of intelligence in contingency operations.

25X1

- Next week, the working group will attend the DIA symposium on low
25X1 intensity conflict. In the meantime, Paul and have been working on a detailed outline for the study.

25X1

SDI Study -

- The first meeting of the SDI working group was held on 30 April. All CIPC members except Treasury and the USMC have named representatives to the working group. It is worth noting that some of the working group members are apprehensive in doing the study, even after very clear assurances from
25X1 Ray Wotring and the working group chairman, that the CIPC

WEEKLY ACTIVITIES & STATUS REPORT FOR THE DD/ICS--7 MAY 1986

25X1

25X1

Force Multiplier Study -

- The Force Multiplier Task Force is scheduled to convene on 9 May to initiate the Force Multiplier study.

25X1

CSEM -

- Attention continues to laying the preparation to make efficient use of the services of the CSEM programmer we expect on 12 May. It now appears that it may be feasible to work with the VM time-sharing terminal the IHC has here in the CHB (rather than use an IBM/AT at Headquarters). If this proves out, it could make the programming, testing, debugging of CSEM algorithms more convenient and expeditious.
